Letter of Recommendation for Prestige Builders

To whom it may concern,

I have had the pleasure of working with Prestige Builders on several residential projects over the last fifteen years. During this time, I have found Prestige Builders to be completely committed to excellence in their craft. The quality of their execution and the accountability of their service has placed them in a league of their own.

Architecture, for us is a craft that requires the highest level of execution. Buildings are three-dimensional objects constructed from two-dimensional set of plans. Invariably, no two builders will interpret the plans in the same manner. We've found that with Prestige Builders, the end result far exceeds our expectations both in quality and execution. Each detail is carefully discussed and in many cases mocked up so that we can arrive at the ideal solution. I don't remember a time when Prestige Builders told us that something we were considering could not be accomplished. In fact, often they would come back to us with a solution that we had not even considered, as well as the resolve and experience to see an idea through to completion.

Another dynamic in the process of creating architecture is the relationship one shares with their clients. With Prestige Builders, I have always been confident that our clients are in good hands and that the relationship between all members of the team is positive and productive. Like many architectural firms, we do not advertise. We therefore rely upon our clients being pleased at the end of the day and referring us to others. Prestige Builder's engagement with the client inspires trust and accountability and subsequently this leads to future possibilities.

While there are many fine and capable builders in this area from which to choose, I believe that Prestige Builders has both the professional, as well as personal skills that set them apart from their colleagues. For us, Prestige Builders have become the benchmark from which we evaluate others in their field. We look forward to continuing our relationship with Prestige Builders and wish them the best with their future endeavors.

With pleasure,

Horst R. Noppenberger AIA
